

JamesEdition Leads Pull API

Version 1.0

Date: 11 of March, 2024

The JamesEdition Leads API provides a solution for retrieving information about leads generated on the JamesEdition platform. This API allows you to seamlessly integrate lead data into your applications.

To start using the JamesEdition Leads API and integrate lead data into your applications, follow these steps:

For Single Offices:

Log in to your JamesEdition Seller Dashboard.

Navigate to the Company section within the dashboard.

Copy the provided API token.

For Groups:

Contact Customer Support:

Customer Support will guide you through the process of obtaining the API token tailored to your group and provide any additional assistance needed.

Note:

Ensure that the API token is kept confidential to maintain the security of your account and data. Customize API requests based on your specific requirements, utilizing optional parameters for date range filtering.

Retrieve the leads list

HTTP GET
